

I am now happy to present version 1.0 of my index for the World's largest dungeon, changes from v.9 are listed down the bottom, as are possible future changes.

Some notes on the index:

Firstly, it's important to note that this index is to some level idiosyncratic, as is the WLD itself, the combination means that this index may sometimes come across as a little bit schizophrenic, for this I apologise.

Secondly, in Monster Name the following structure was used (as of v1.0 this should be fairly standard throughout)

Creature type, subtype, template, Flavour text, Class, Prestige Class

With some of the more overwhelming templates (eg, skeleton, vampire) they will also have an entry like this;

Template, creature type, subtype, Flavour text, Class, Prestige Class

And some of the more innocuous creature types (ie, humans and 'the dead') may not have a creature type at all, but only if they have a template, as such they read like:
Template, Flavour text, Class, Prestige Class

Familiars, mounts, animal companions and such are noted in the name box as who they belong to, but only NPC familiars. Familiars without names were relegated to monster status, and go sadly unremarked... mostly.

Thirdly, I'm far from perfect, but I am happy to correct the numerous mistakes you will no doubt find – when you do please e-mail them to [pelvo\(at\)hotmail\(dot\)com](mailto:pelvo(at)hotmail(dot)com) and include [WLD] in your subject heading, if you don't it'll probably go the way of all my junk mail.

Fourthly, it is very possible for players to pick up this index and the PDF maps and cheat their asses off. Obviously I can't stop you, nor would I want to, but I'd like to take this moment to mock you, thank you for your time.

Changes made from v.9

- Correctly spelt Assassin in Assassin vine
- Moved black puddings, gelatinous cubes and ochre jellies out of their own category and into the ooze category where they belong
- Changed a bugbear, cleric, healer to bugbear, healer, cleric to more correctly fit the convention
- Wondered if it was me or AEG who missed the Avoral and the Skum
- Added Monstrous Centipede, Monstrous Spider and Monstrous Scorpion while also keeping their old entries of the (creature), Monstrous. I can see both as being useful.

- Moved Duergar and Deep Dwarves to Dwarf, Duergar and Dwarf, Deep Dwarf
 - Gave the Deep Dwarf Zombie a Zombie entry as well as his Dwarf entry
 - Moved the Erinyes back into their devilish Creature type and out of the Demonic creature type, whoops.
 - Gave Hellcats, Lemures, Pit fiends, and Imps the Devil creature type, apparently I don't like devils.
 - Made the Dinosaur, Megaraptor, Fiendish slightly less fiendish by giving it a lower case i
 - Added Dire as a creature type so eg. Rat, Dire becomes Dire Rat, kept the old ones in though. Technically it should be Dire animal, Dire Rat but I thought that was silly.
 - Made Alecia into a Dryad from a Dyad.
 - Added metallic or chromatic to dragon names, seems superluous, but you never know.
 - Corrected Earth, Elemental, Elder, Fiendish to Elemental, Earth, Elder, Fiendish
 - Gave the Efreeti his Genie type
 - Gave Fire Beetle, Giant an entry in Giant Fire beetle, because that's how he's listed.
 - Gave some Formian's some commas, and changed the Warrion into a warrior
 - Put Ghosts and Lacedons under the ghoul type.
 - Moved Stone Golems under the Golem heading
 - Grouped the Sprites
 - Gave the gynoshpinx the sphinx creature type.
 - Had the hill and stone giants join the giant creature type.
 - Had Hobgoblin, Fighter, Taskmaster reordered to Hobgoblin, Taskmaster, Fighter
 - Undid the spelling mistake in "Homunculus"
 - Added the Inevitable Creature type, and moved the inevitables into it.
 - Changed a Lantern Archon to an Archon, Lantern
 - Changed a lizard, Shocker to a Shocker lizard
 - Grouped the werecritters under lycanthrope.
 - Changed the Mohrg Hrode into the far less dirty sounding Horde
 - Capitalised the Orc warriors
 - Gave the Orcas the whale type.
 - Made the Quasit into a demon, so now there are no Q monsters... how sad.
 - Gave Rat, Fiendish Dire a comma between Fiendish and dire, increasing the size of the document by 5 bytes.
 - Corrected a misspelt Tendriculos
 - Some formatting changes
- Incorporated monsters from <http://www.james.neetersoft.com/wld/wld.htm>

Possible future changes:

- Make it prettier
- More index like feel
- More typos and junk
