Family Activities On The Rise

Organized crime, in the form of the Family criminal organization based in Crysillyr, is on the rise. Undercover reports indicate that the Family sees the growth of Flint as an opportunity to expand into a new market, and for the past year has been competing with various local gangs. Morgan Cippiano, the face of the Family in Flint, has been

heard to say that the organization deliberately focuses its violence against other criminals, wealthy factory owners, and merchants, rather than everyday people. An intense rivalry is escalating between the Family and Lorcan Kell, who is reputed to be a fixture in the industrial smuggling scene.

Renowned for their loyalty, the Family follows a strict code of conduct. They are known for their brutal tactics, and their influence is growing in the city. The Family's actions have led to a series of violent incidents, and the city is now a hotbed of crime. The Family's presence in Flint is a cause for concern, and many are calling for action to be taken.

Tremors Shake Flint

For the past few months, tiny tremors have shaken the city of Flint, which has no history of earthquakes. Dockers poets portray this as a manifested metaphor of the rifts opening up

between the different districts and cultures. Angry protests march through Bosum Strand and Parity Lake to denounce the cruel treatment of factory workers.

Gale's Parity Arson

A rash of eighteen small fires in Parity Lake is believed to be arson. So far the burns have killed over forty, but fire responders have managed to keep them from

spreading. The fires seem to target properties of factory owners, even the occasional factory out-building, and so are believed to be the work of the terrorist known as Gale.

Gale Strikes Again!

The criminal known as "Gale" - so dubbed due to her singular ability to fly away from the scenes of her crimes, despite most scholars claiming that such flight magic is impossible - has sabotaged another factory in Flint. In the past month, she has been responsible for various acts of industrial sabotage, and for unmooring ships which drift into Flint Harbor and sink. She has won the sympathies of those who view industry as Danoran meddling, but many common workers see

her as a threat to their livelihood. The government has labelled her a foreign provocateur with ties to the Vakeshi Mystics. She is also blamed for thefts from the homes of wealthy factory owners, for the killings of a company of surveyors who wandered in the Cloudwood to site a potential railroad, and for a botched assassination attempt against Kane Westman, a tax collector with strong political friends.
