

DIRECTIONS

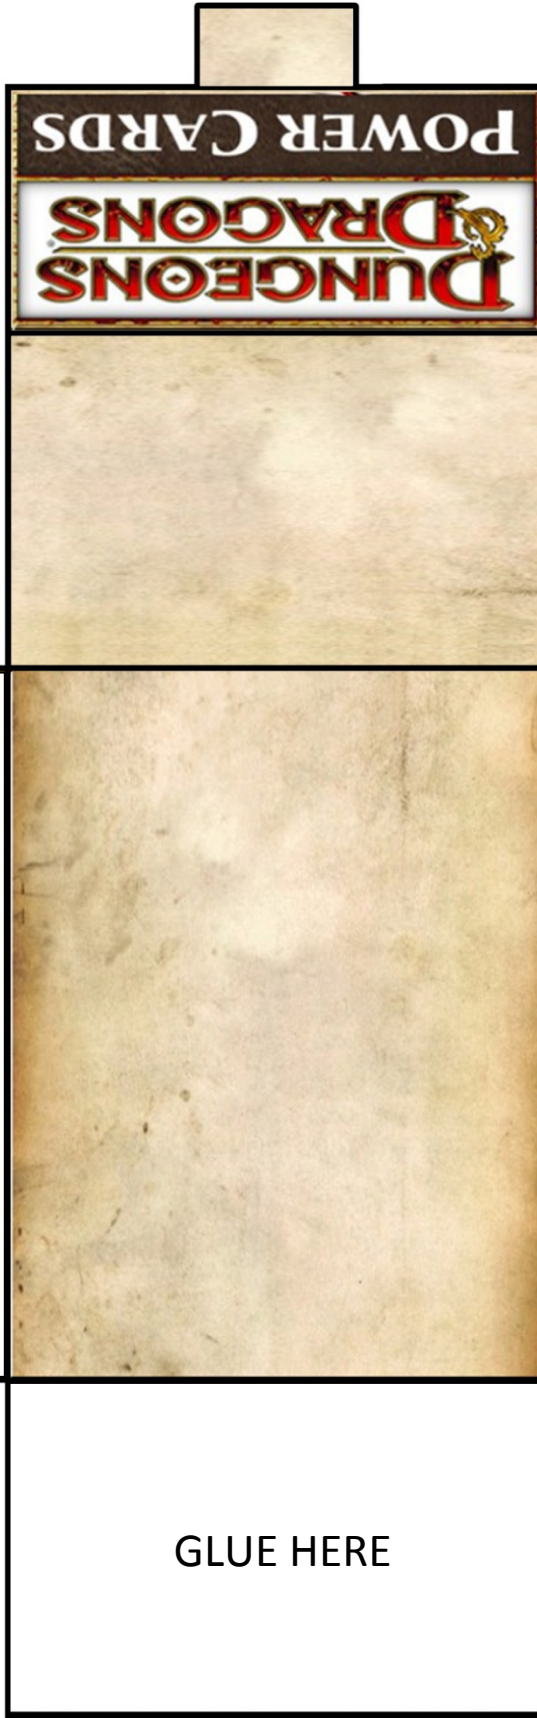

1. Page 1 has dragon and divider – two separate pieces. Page 2 is the back with a fold-over top cover.
2. Cut out all three pieces. Set divider aside.
3. Cut V-notch from front piece. (Don't cut slot for tab until after you've folded the top so that you can ensure the tab fits into the slot.)
4. Fold along lines (except line above dragon and line along tab).
5. Glue bottoms together. The white bottom from the back piece should be on the inside with the parchment from the front piece on the outside. Glue sides together with back piece set inside the front.
6. Fold divider in half and glue together.
7. Print Power Cards to store inside!

For personal use only.
