A Note About Pronouns

The male pronoun (he, him, his) is used exclusively throughout the second edition of the AD&D game rules. We hope this won't be construed by anyone to be an attempt to exclude females from the game or imply their exclusion. Centuries of use have neutered the male pronoun. In written material it is clear, concise, and familiar. Nothing else is.

Creating a Character

To create a character to play in the AD&D game, proceed, in order, through Chapters 1 through 6. (Chapter 5 is optional). These chapters will tell you how to generate your character's ability scores, race, and class, decide on his alignment, pick proficiencies, and buy equipment. Once you have done all this, your character is ready for adventure!
