

Unto the Protector

From Brother Bernard of the Militant Order of the Knights of the Misty Dawn

This is to let you know that I have received reports that bear on the present situation.

1. Apparently troop transports slipped to shore about 50 miles up the coast and landed foot soldiers and gear. They are presently marching toward us from the north east.
2. An additional sea fleet is approaching from the northwest - about 230 ships strong, give or take
3. A small force has emerged from the underdark directly east of the city 40 miles and is making its way more stealthily toward the Holy See, we would be unaware of this one, but some of its members started raiding farms.

In response to this I have notified "secular" authorities to send foot legions and horse legions from anywhere they are barracked as quickly as possible. I have also asked the Admiral of the Defense Fleet of the Blessed Light to attempt to intercept whatever they can.

Finally, We have acted without the permission of the Holy See to hire, as quickly as possible, Phraint mercenaries. They will not be present for the battle, but they can help in the aftermath, this victory will, I am sure, be costly - and after it I am sure we all want to see the holy see protected.
